

# VIRTUAL LESSONS

Are you on the fence regarding online lessons for your child? At RRLS, we have achieved enormous success in delivering effective online lessons that students enjoy. Just as with in-person sessions, we continue tailoring lessons to the student's academic needs and personal learning style.

## CONCERNED ABOUT ATTENTION?

We've encountered two types of situations:

- Students who struggle with sustained attention have been able to successfully focus with shorter, 30-minute virtual lessons.
- Students who are easily distracted in person have really enjoyed interacting with their teacher online using fun tech tools.

## WHY TAKE RRLS VIRTUAL LESSONS?

- All of our virtual lessons are delivered in real time. Each student interacts with their Learning Specialist, asks questions, and stays engaged through activities created just for them. We use collaborative virtual spaces such as online whiteboards and fun, educational games with virtual manipulatives.
- We are experts in assistive technologies! We have an extensive list of apps, websites, software, and extensions that we incorporate into our lessons depending on the student's needs and learning style.
- We understand that when delivering virtual lessons, creating and maintaining a bond between teacher and student is key to achieving educational goals.
- There is no commuting! Students can access our premium academic support from the comfort of their own home.
- We can help students customize a space at home that recreates an RRLS classroom, achieving an ideal learning environment.
